ABOUT SUSAN G. KOMEN® DALLAS COUNTY

Susan G. Komen is the world's largest breast cancer organization, funding more breast cancer research than any other nonprofit while providing real-time help to those facing the disease. Komen was founded by Nancy G. Brinker, who promised her sister, Susan G. Komen, that she would end the disease that claimed Suzy's life. Susan G. Komen® Dallas County is working to better the lives of those facing breast cancer in the local community. Through events like the Komen Dallas Race for the Cure®, Komen Dallas County has invested more than \$24 million in community breast health programs in Dallas County and has helped contribute to the more than \$889 million invested globally in research.

Grant Application Limitations

- Applicants may request funding up to \$250,000 per organization for one year (See Budget Guidelines for more information). **All awarded grants are fully funded.**
- Applicants, who would like to submit multiple applications, must timely request permission to do so. Organizations must submit a Letter of Intent by October 15, 2016, detailing the uniqueness of each program with a need for separate grant applications. The Affiliate will review the Letter of Intent and notify you as to whether you will be permitted to submit multiple applications. You may not submit multiple applications without prior approval by the Affiliate. **Note: If the organization intends to use Komen grant funds to run programs with various staff, locations, facilities, etc., a Letter of Intent to submit multiple applications needs to be submitted unless a clear demonstration of how the funds will be used (by various staff, locations, facilities, etc.,) is explained in the application.**
- Entities that share a Tax ID number, regardless of the name used to conduct business are considered part of the same organization.
- Applications and/or Organizations exceeding the \$250,000 limit will **NOT** be considered

compliant and will not progress to the review panel.

- It is the responsibility of each organization (**NOT** Komen Dallas County) to ensure their total request does not exceed \$250,000.

Grant Categories

- **Screening/Treatment Grants**

Komen Dallas County is offering grants for projects that provide direct medical services for screening mammograms, diagnostic services, and/or treatment with appropriate follow up for abnormal findings to people who are medically underserved, underinsured, uninsured and/or low-income.

The following are the maximum allowable requests per category:

- Screening \$100,000
- Diagnostics \$100,000
- Treatment \$100,000

Education, Patient Navigation, and/or Support Grants

Komen Dallas County is offering grants **up to \$50,000** for projects that provide: breast cancer education, community health workers, patient navigation, and/or support services (e.g. translation services, transportation services, etc.), to people who are medically underserved, uninsured, and/or low-income. Projects should be culturally appropriate for targeted populations and **must** link project participants with breast cancer screening, and follow-up, as applicable. Support programs can vary (e.g. patient navigation, emotional support programs, community outreach breast health/cancer programs, health/wellness promotion programs, emergency living expenses, childcare expenses, temporary gap funding, transportation assistance, support groups for breast cancer survivors, and their families).

NOTICE OF FUNDING OPPORTUNITY AND STATEMENT OF NEED

Komen Dallas County will award community grants to organizations that will provide breast health and breast cancer projects that address funding priorities, which were selected based on data from the 2015 Komen Dallas County Community Profile Report. The 2015 Community Profile Report can be found on our website at <http://komen-dallas.org/about-us/history-impact/our-community-need-2/>.

Priority will be given to applicants that demonstrate benefit to African-American women residing in one or more of the following target communities:

- Cedar Hill
- Desoto
- Lancaster
- South Dallas

The funding priorities are as follows:

- Projects incorporating the use of community health workers (CHWs) who are fluent in and sensitive to the language and culture of the audience that the health care programs want to reach with positive breast health messages. These projects should be evidence-based, and must focus on providing in-depth breast cancer education and outreach that link patients to care and result in: completed breast cancer clinical services (e.g. clinical breast exams, screening mammograms, etc.). Projects need to have pre-test/post-test tools to evaluate the change in the participant's knowledge about breast cancer risk, screening recommendations, and utilizing the health care system to access recommended screening.
- Evidence-based projects that focus on screening, diagnostics, treatment, and transportation to services in a timely fashion.
- Projects that provide emergency living expenses (e.g. rent, utilities, groceries, etc.), and childcare services.
- Projects that focus on providing culturally appropriate, evidence-based, patient navigation, including translation services, if needed, and advocacy through the full continuum of care (e.g. screening to treatment services). This navigator program must perform the necessary outreach to find the medically underserved and guide them through the process necessary to get the needed screenings and treatment. The navigator will need to have knowledge of breast cancer and related services provided from all available sources, including, but not limited to: transportation, and financial assistance.

Examples of successful projects funded by Komen in the past include those that:

- Increased the number of women that utilize regular breast cancer screening;
- Decreased time from referral to mammography screening;
- Reduced the number of women “lost to follow-up;”
- Reduced time from abnormal screening to diagnostic procedures;
- Reduced time from diagnostic finding to treatment;
- Increased treatment compliance; and
- Increased mammography capacity, through development of process improvements and relationship building efforts.

Komen Dallas County accepts applications for programs outside of the defined target areas. While these target areas are of interest to Komen Dallas County, applications are welcome from all regions in our service area so as not to lose the progress made in the fight against breast cancer. **However, we strongly encourage applications that provide new or expanded projects in the identified targeted areas of need.** Komen Dallas County will consider high-quality projects that meet the needs of the medically underserved that do not directly relate to the geographic priorities identified in the Community Profile.

Komen Dallas County defines the medically underserved as people who either: do not have health insurance, who have health insurance that does not include coverage for breast health services, or who have insurance that requires prohibitively expensive out-of-pocket payments to access care. Additionally, we recognize that some individuals may not receive adequate care because of barriers such as language, cultural differences, economics, violence, and fear.

Komen Dallas County does not guarantee continued funding from year to year.

EDUCATIONAL MATERIALS AND MESSAGES

Susan G. Komen is a source of information about breast health and breast cancer for people all over the world. To reduce confusion and reinforce learning, we only fund projects that use educational messages and materials that are consistent with Komen messages, including our breast self-awareness messages -- know your risk, get screened, know what is normal for you and make healthy lifestyle choices. The consistent and repeated use of the same messages can reduce confusion, improve retention and lead to the adoption of actions we believe are important for quality breast care. Please visit the following webpage before completing your application and be sure that your organization can agree to promote these messages:

<http://ww5.komen.org/BreastCancer/BreastSelfAwareness.html>.

Breast Self-Exam- must not be taught or endorsed

According to studies, teaching breast self-exam (BSE) has not been shown to be effective at reducing mortality from breast cancer and therefore **Komen will not fund education projects that teach or endorse the use of monthly breast self-exams or use breast models**. As an evidence-based organization, we do not promote activities that are not supported by scientific evidence or that pose a threat to Komen's credibility as a reliable source of information on the topic of breast cancer.

Creation and Distribution of Educational Materials and Resources

Komen Affiliate Grantees are encouraged to use Komen-developed educational resources, including messages, materials, toolkits or online content during their grant period. This is to ensure that all breast cancer messaging associated with the Komen name or brand are current, safe, accurate, consistent and based on evidence and to avoid expense associated with the duplication of existing educational resources. Komen Grantees can purchase Komen educational materials at the Affiliate preferred price. If a grantee intends to use other supplemental materials, they should be consistent with Komen messages.

Komen grantees are eligible to receive preferred pricing for Komen educational materials. Komen materials should be used and displayed whenever possible. To view our educational materials, visit www.shopkomen.com.

Use of Komen's Breast Cancer Education Toolkits for Black and African-American Communities and Hispanic/Latino Communities and Other Resources

Komen has developed Breast Cancer Education Toolkits for Black and African-American communities and Hispanic/Latino communities. They are designed for educators and organizations to use to meet the needs of these communities. The Hispanic/Latino Toolkit is available in both English and Spanish. To access the Toolkits, please visit <http://komentoolkits.org/>. Komen has additional educational resources, including on [komen.org](http://www.komen.org), that may be used in community outreach and education projects. Check with Komen Dallas County for resources that may be used in programming.

Example Work Plan (For additional examples and a SMART objective checklist, please refer to Appendix A.)

GOAL: Provide patient navigation to women with screening abnormalities in order to reduce delays in and barriers to diagnostic care.

OBJECTIVE 1: By February 12, 2018, the patient navigator will have contacted 100 percent of all women with an abnormal screening result within three business days to schedule a follow-up appointment.

OBJECTIVE 2: By March 31, 2018, the project will provide 30 uninsured/underinsured women free/reduced cost diagnostic procedures within 30 days of an abnormal screening.

APPENDIX A: WRITING SMART OBJECTIVES

Project planning includes developing project goals and objectives. **Goals** are high level statements that provide overall context for what the project is trying to achieve. **Objectives** are specific statements that describe what the project is trying to achieve and how they will be achieved. Objectives are more immediate than goals and represent milestones that your project needs to achieve in order to accomplish its goal by a specific time period. Objectives are the basis for monitoring implementation of strategies and/or activities and progress toward achieving the project goal. Objectives also help set targets for accountability and are a source for project evaluation questions.

Writing SMART Objectives

To use an objective to monitor progress towards a project goal, the objective must be **SMART**.

A **SMART** objective is:

1. **Specific:**
 1. Objectives should provide the “who” and “what” of project activities.
 2. Use only one action verb since objectives with more than one verb imply that more than one activity or behavior is being measured.
 3. Avoid verbs that may have vague meanings to describe intended output/outcomes (e.g., “understand” or “know”) since it may prove difficult to measure them. Instead, use verbs that document action (e.g., identify 3 of the 4 Komen breast self –awareness messages).
 4. The greater the specificity, the greater the measurability.
2. **Measurable:**
 1. The focus is on “how much” change is expected. Objectives should quantify the amount of change expected.
 2. The objective provides a reference point from which a change in the target population can clearly be measured.
3. **Attainable:**
 1. Objectives should be achievable within a given time frame and with available project resources.
4. **Realistic:**
 1. Objectives are most useful when they accurately address the scope of the problem and projectmatic steps that can be implemented within a specific time frame.
 2. Objectives that do not directly relate to the project goal will not help achieve the goal.
5. **Time-bound:**
 1. Objectives should provide a time frame indicating when the objective will be measured or time by which the objective will be met.
 2. Including a time frame in the objectives helps in planning and evaluating the project.

SMART Objective Examples

Non-SMART objective 1: Women in Green County will be provided educational sessions.

This objective is not SMART because it is not specific, measurable, or time-bound. It can be made SMART by specifically indicating who is responsible for providing the educational sessions, how many people will be reached, how many sessions will be conducted, what type of educational sessions conducted, who the women are and by when the educational sessions will be conducted.

SMART objective 1: By September 2017, Pink Organization will conduct 10 group breast cancer education sessions reaching at least 200 Black/African American women in Green County.

Non-SMART objective 2: By March 30, 2018, reduce the time between abnormal screening mammogram and diagnostic end-result for women in the counties of Jackson, Morse and Smith in North Dakota.

This objective is not SMART because it is not specific or measurable. It can be made SMART by specifically indicating who will do the activity and by how much the time will be reduced.

SMART objective 2: By March 30, 2018, Northern Region Hospital breast cancer patient navigators will reduce the average time from abnormal screening mammogram to diagnostic conclusion from 65 days to 30 days for women in the counties of Jackson, Morse and Smith in North Dakota.

SMART Objective Checklist

Criteria to assess objectives	Yes	No
1. Is the objective SMART?		
1. Specific: Who? (target population and persons doing the activity) and What? (action/activity)		
2. Measurable: How much change is expected?		
3. Achievable: Can be realistically accomplished given current resources and constraints		
4. Realistic: Addresses the scope of the project and proposes reasonable projectmatic steps		
5. Time-bound: Provides a time frame indicating when the objective will be met		
2. Does it relate to a single result?		
3. Is it clearly written?

APPENDIX C: DEFINITION OF GOOD STANDING

Compliance Check-“ In good standing”

During the application compliance check, Komen Dallas County may determine whether the organization submitting an application is in good-standing. In good standing for this purpose is defined below. APPENDIX D: DEFINITIONS

This section expands on terminology and concepts mentioned in this Request for Applications (RFA). Having a clear understanding of these terms is vital to completing a well-written response to this RFA.

- **Affiliate:** Susan G. Komen® Dallas County
- **Applicant:** Agency, foundation or organization responding to this RFA. All applicants must provide proof of non-profit status.
- **Breast Self-Awareness:** Susan G. Komen®'s core concepts to increase public awareness to promote improvements in breast cancer outcomes:
 - Know your risk
 - Get screened
 - Know what is normal for you
 - Make healthy lifestyle choices
- **Continuum of Care:** The continuum of care refers to the range of services available within the health care sector, and to some extent, outside of it, that address services and access to breast health, breast screening, diagnostics, breast cancer treatment and survivorship services. The continuum of care is a theoretical model rather than an actual system of care delivery.
- **Evaluation Plan:** A detailed plan of how you will measure achieving the program objectives and how the impact of the program will be assessed. It includes who will conduct data collection, when data will be collected and what methods will be used, such as surveys, intake forms, etc.
 - A strong evaluation plan measures the quantity (i.e. numbers served) and quality (i.e. satisfaction of the implementation and effectiveness of the outcomes). Staff members responsible for evaluation need the ability to:
 - ✓ Assess program outcomes
 - ✓ Monitor program processes and performance of program
 - ✓ Analyze evaluation data and results
 - ✓ Present evaluation findings
- **Evidence- Based Practices:** Strategies have been tested, evaluated, and found to be effective in improving access, promoting behavioral change and/or empowering individuals to make healthy breast health decisions. Evidence-based strategies are peer reviewed, and usually published in a public health or medical journal.
- **Grant Review Panel:** The Grant Review Panel is an independent group comprised of health care professionals, educators, advocates, community members, representatives from other nonprofits, breast cancer survivors, and other types of professionals (including accountants, attorneys, financial professionals, etc.), who are invited by the Affiliate to review all incoming grant applications and make funding recommendations to the Affiliate's Board of Directors.
- **Medically Underserved:** A term that refers to individuals who either: do not have health insurance, who have health insurance that does not include coverage for breast health services, or who have insurance that requires prohibitively expensive out-of-pocket

payments to access care. Additionally, some individuals may not receive adequate care because of barriers such as language, cultural differences, economics, violence and fear.

- **Measurable Outcomes:** Program proposals must include a detailed evaluation plan that outlines proposed outcome measures that are relevant to program services and include the number of services provided as well as individuals served, as well as more qualitative measures like changes in a patient's ability to better engage in everyday life or satisfaction with services provided. These projections may be derived from previous, comparable project outcomes, from data from programs providing similar services or from information provided by a community needs assessment. Funded applicants must report how many actual services were provided during the granting cycle, as compared to the estimates made in this application. You must also be able to report all information applicable to your application category listed in the Exhibit D-Demographic Tracking Report, and provide an engaging patient success story using Exhibit E, which can be found at <http://komen-dallas.org/grants/how-to-apply-for-community-grants/>.
- **Proof of Insurance:** In circumstance, such as a grant, where the Affiliate does not have direct control over an activity and cannot, therefore, manage the risk associated with the activity, the Affiliate should ensure that the third-party adequately manages the risk. In the grant context, the grant agreement provides that the Affiliate is only responsible for funding the grant, and all activities of the grantee and any problems that arise from those activities are the exclusive responsibility of the grantee. Therefore, we require that grantees indemnify or defend the Affiliate if someone claims that the Affiliate is responsible for the actions of the grantee, by providing proof of insurance coverage to cover any potential claims. Please see RFA for more information.
- **RFA:** Request for Applications
